

ICF Southern
INSULATED CONCRETE FORMS

NUDURA INSTALLATION TRAINING COURSE

Lodge Hill Centre, Watersfield, Near Pulborough, West Sussex, RH20 1LZ

Conducted by the UK's NUDURA expert - Jean-Marc Bouvier, who has over 30 years' experience in building with ICF technology in North America, the course provides a combination of informative presentations and practical, hands-on learning.

The intensive, one day, course is the first step to becoming a licensed installer of Nudura ICF, however it is also perfect for construction professionals who want to know more about the product, the technical attributes and benefits of the systems, and for home builders and renovators who are looking to use the system and want to find out more about it first.

The NUDURA Installer Course includes details on:

- Introduction to the NUDURA Integrated Building Technology
- Tools and materials
- Excavation and layout
- Footings and slabs
- Installation of NUDURA form units
- Rebar placement
- Installation of door and window frames
- Wall alignment and scaffolding system
- Service penetrations
- Concrete specifications, placement and consolidation
- Special details
 - Lintel design, proper use of tables
- Reviewing requirements of the overall project which interface with the NUDURA Building Technology
- Damp proofing/Waterproofing
- Mechanical installation
- Air/Vapour barrier
- Interior finishes
- Exterior finishes
- Code compliance

All participants will receive an installation manual, workbook and classroom/technical materials with breakfast, lunch and refreshments throughout the day.
